

Utility Rebate - Energy Efficiency Programs

When cash is up for grabs, why not take it?

Power Efficiency Corporation is working with various local utility companies in a combined effort to encourage utility customers (commercial and industrial operations) to reduce energy consumption on electric motor systems. Utility customers can participate in several ways. Each utility offers unique programs for various electric motor applications and their customers are rewarded according to program qualifications and the result of energy savings from the Power Efficiency Motor Efficiency Controller.

Electric motors consume roughly a quarter of all electricity in the United States and over 60% of all electricity used by the commercial, industrial, and manufacturing sectors of our economy.

The Power Efficiency Motor Efficiency Controllers with new E-Save Technology™ cut energy use dramatically! Time and again it has proven to save up to 40% of the energy normally used in appropriate applications.

WHAT ARE THE BENEFITS OF THE MOTOR EFFICIENCY CONTROLLER?

- Saves energy in a variety of commercial and industrial applications
- Qualifies for utility rebates
- Features soft start functionality

WHO CAN BENEFIT?

Utility customers that operate equipment or machinery running at a constant speed with variable loads can benefit from participating utilities. Customers include but are not limited to:

Commercial Facilities

- Hotels
- Casinos
- Convention Centers
- Large Commercial Retailers
- Malls and Shopping Centers
- Airports, Subways, and Transit Authorities
- Large Property Management Groups

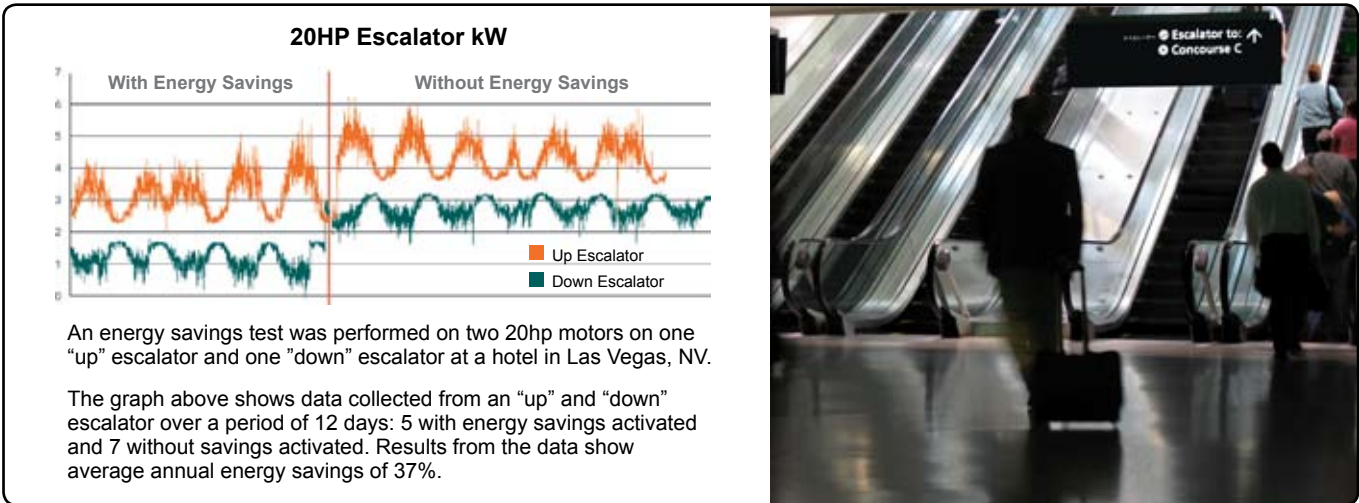

Industrial Facilities

- Cement Plants
- Plastics Manufacturing Plants
- Aggregate Plants
- Mining Facilities

PARTICIPATING UTILITIES

Utility Name	State	Service Territories	Utility Rebate Description	Commerical Application	Industrial Application	
Anaheim Public Utilities	CA	Anaheim	APU provided plastic manufacturer incentive of \$.075/kwh for granulator applications		Granulator	
San Diego Gas & Electric	CA	San Diego County	Power Efficiency is a qualified energy efficiency aggregator	Escalator	Jaw Crusher Granulator	
Los Angeles Dept. of Water & Power	CA	Los Angeles and portion of Owens Valley	LADWP provided Los Angeles County Metropolitan Transportation Authority with a rebate on escalators	Escalator		
Southern California Edison	CA	Southern California	SCE committed to pay \$.08/kwh for the first year to customers that install motor efficiency controllers on their escalators	Escalator		
Sacramento Municipal Utility District	CA	Sacramento County and portion of Placer County	SMUD offers prescriptive rebates of \$20/hp on escalators to commercial customers	Escalator		
Xcel Energy	CO TX NM SD	ND MI WI MN	Portions of CO, TX, NM, SD, ND, MI, WI, MN	Xcel Energy offers cash rebates for purchasing and installing elegeble energy efficient equipment and mechanical system components	Escalator	
Nevada Power Sierra Pacific	NV NV and CA	Southern NV Northern NV, portions of CA	Nevada Power offers prescriptive rebates of \$20/hp on escalators to commercial customers	Escalator	Jaw Crusher	

Note: If your local utility is not listed above, we can work with them to determine what programs may be available to you.

A list of possible applications for the three-phase Power Efficiency Motor Efficiency Controller includes:

- **ESCALATORS**
- **ELEVATORS (MG SETS)**
- **CONVEYORS**
- **GRINDERS**
- **CRUSHERS**
- **GRANULATORS**
- **STAMPING PRESSES**
- **COMPRESSORS**
- **POLISHERS**
- **BALERS**

HOW TO GET STARTED

Each utility offers unique programs and has different criteria according to product type and energy saving performance results. To learn more about a specific program or how to apply, contact Power Efficiency Corporation today and we will work with your utility to determine if rebates are available.

Find out if your business and its application/s will qualify for a utility rebate. Call 1-800-975-9111 or email sales@powerefficiency.com
